*Sue's
Top Tip*

Leave chard plants in the ground over winter and they will produce a fresh flush of tender leaves in spring before they flower.

Sue Russell, Horticultural Expert

Swiss Chard Fordhook Giant

Unleash the mighty Swiss Chard 'Fordhook Giant' - a vibrant green giant that towers up to 60cm (24") tall!

Embrace its grandeur on your veggie plot or let it dazzle in borders

Its heavily savoyed leaves boast a dark green hue and striking ivory stems, an exciting alternative to spinach. Enjoy the thick, tender leaves in steamed dishes or add a burst of colour to your stir-fries. A time-tested gem from the 1920s, this variety continues to captivate gardeners worldwide.

50cm (20in). Sow: Mar-Aug. Harvest: Mar-Oct.

780183 100 seeds £2.99

Climbing French Bean Sunshine

Brace yourself for the spectacle of long, golden pods stretching up to 18cm (7") - a shimmering sight against the lush green foliage.

With its stringless, slender pods, 'Sunshine' promises heavy yields of delectable beans from July to October, making it a non-stop taste sensation. But it's not just about flavour - this stunner adds a touch of elegance to your veggie plot and is even alluring enough for the flower border.

1.8m (6ft). Sow: Apr-Jun. Harvest: Jul-Oct.

780018 50 seeds £2.99

A true marvel from the same breeder as the beloved 'Cobra'

Swiss Chard Fordhook Giant

Pea Rondo Exceptional performance earned Rondo the prestigious RHS AGM. Prepare for a bountiful harvest with two pods per node, containing 10 deliciously plump peas each.

The highest quality pods and an unforgettable taste

Shines with wrinkle-seeded charm and strong resistance to Fusarium wilt. Whether frozen or fresh, this pea promises an unforgettable taste adventure. An average of 10 deliciously plump peas per pod.

75cm (30in). Sow: Mar-Jun. Harvest: Jun-Sept.

780443 125 seeds £2.99

Parsnip Guernsey A heritage variety that brings a French twist to your garden! Prepare for good yields of smooth, attractive white roots.

Aptly called "Half Long," it boasts broad shoulders and a shorter root, making it a powerhouse for poor, shallow, or stony soils.

Versatile variety ideal for any challenging soil conditions!

Sow: Mar-Jun.

780427 £2.99

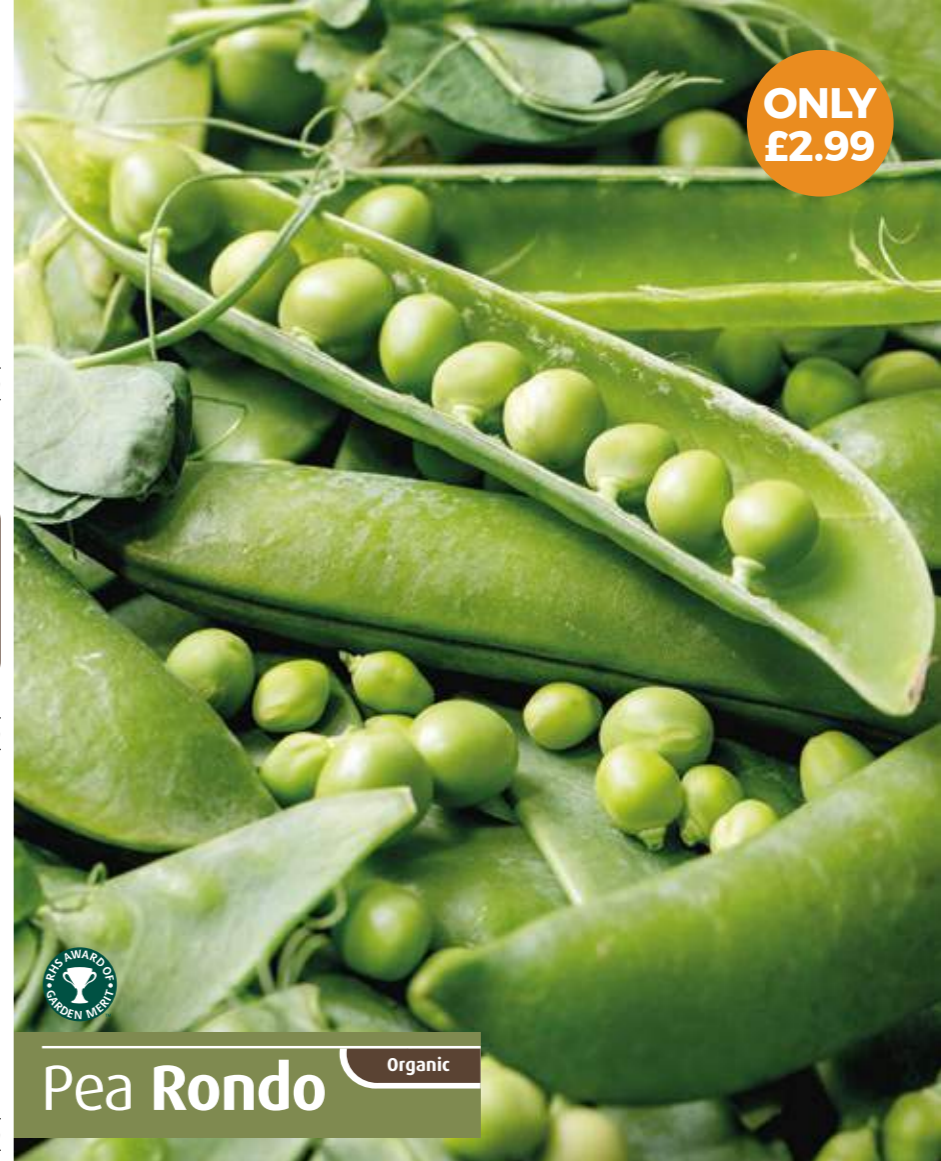

Sorrel Bloody Dock One of the most stunning perennial herbs you'll ever grow! Its long, dark green leaves boast brilliant red veining, making a striking addition to your garden.

Fresh apple-like taste, perfect for salads

Dive into the world of French cuisine as young sorrel leaves add their flavourful magic to fish dishes, soups, stews, and sauces. Shines as an annual with its colourful foliage, whether it graces your borders, herb garden, or veggie plot.

Sow: Mar-Jun.

Runner Bean

Crops 12-16 weeks from sowing. Tasty, nutritious and easy to grow! Unless stated, sow under cover in April for early crops, planting out in late May. For early crops sown outdoors, protect with fleece or cloches to warm the soil and protect the young plants. For tall types in rows, sow outside 5-7.5cm deep, spacing seeds 15cm apart in double rows 45cm apart. Allow a further 1.5m between double rows and keep well-watered. (Alternatively if space is limited, sow in circles and grow up canes in a 'wigwam' format.) Insert long cane supports or netting soon after germination/planting. Plant height of 1.8-2.1m.

✦ Good levels of vitamin C, folate, iron & fibre. ✨ Steam or boil for less than 3 minutes to preserve vitamins. Ideal for freezing.

Heavy cropping, stringless, and superb quality

Lady Di Organic

Enjoy heavy crops of tender runner beans over a long season. Runner Bean 'Lady Di' is a red flowered variety producing completely stringless, 30cm (12in) long pods. 3m (10ft). Sow: Apr-Jun. Harvest: Aug-Sept.

These delicious, nutritious beans can be cooked from fresh or dried and stored 60cm (24in). Sow: Apr-Jun. Harvest: Aug-Oct.

780037	40 seeds	£3.49
--------	----------	-------

Beetroot

Crops 12-16 weeks from sowing. In a sunny spot sow seed thinly in drills (straight shallow grooves) made 30cm apart and cover with about 1.25cm of soil. Thin resulting seedlings to 5-7cm apart. Alternatively for raised beds you can sow in small blocks with a spacing of 5-7cm each way which is more space efficient.
✦ A proven superfood! Roots are rich in potassium and folate plus some vitamin C. The young leaves are rich in beta carotene, calcium and iron.
✦ Don't waste the leaves, use them like spinach! Cooking can actually increase the nutrient value. Cook the young leaves or use them in salads.

Globe varieties Best harvested between a golf and tennis ball size.

Albino White

The super sweet white flesh of this unusual variety has a unique and tasty flavour. The lack of pink juice is a bonus

Cucumber

Crops 12 weeks from sowing. Sow seed singly on edge in 9cm pots under glass at 18–21°C (65–70°F) February-May for greenhouse crops or April-May for outdoors. Later pot on plants into large pots, about 25cm in size, or plant them out in a frame/greenhouse or outdoors. (Do not plant in cold frames until May.)

For standard greenhouse varieties, remove male flowers leaving the female ones (distinguished by swelling on stem behind petals). For standard outdoor varieties leave on both male and female flowers. ‘All female’ varieties produce virtually 100% female flowers which means they will not set fruit without insects for pollination.
+ Low in calories & refreshing (96% water).

Garlic

Our Garlic is selected for Northern European conditions.

Plant Oct-March spacing 15cm between cloves. 150g will plant about a 4m row. When the first six leaves have turned yellow, lift and dry in the sun or in an airy shed. Ideally plant soon after receipt, otherwise store in a cool dry place. Weights quoted are when packed, some drying out may occur. See individual garlic varieties for availability and delivery.

Hardneck Garlic originates from climates with colder winters. It produces larger cloves with a stronger and more interesting flavour, but stores only until mid-winter. Flower stalks with edible 'scapes' appear readily.

Softneck Garlic generally produces smaller, more tightly-packed cloves and has better storage qualities than hardneck varieties. It does not produce flower stalks unless stressed.

Salad

Organic varieties are grown to Organic standards, other varieties are untreated after harvest. All potatoes listed are produced without using peat. All seed potatoes comply with UK quality and disease control regulations. Please unpack and inspect on receipt and put to sprout in a light, cool, well-ventilated place, free from frost. Bags contain stated weight when packed. 1kg gives 11-15 tubers which, if spaced 70cm between rows and 30cm between tubers, will plant about 3m². Plant closer for a crop of smaller potatoes.

First early

Varieties are quick growing, cropping in around 10 weeks. Not recommended for storage. A good choice to avoid potato late blight.

C S M

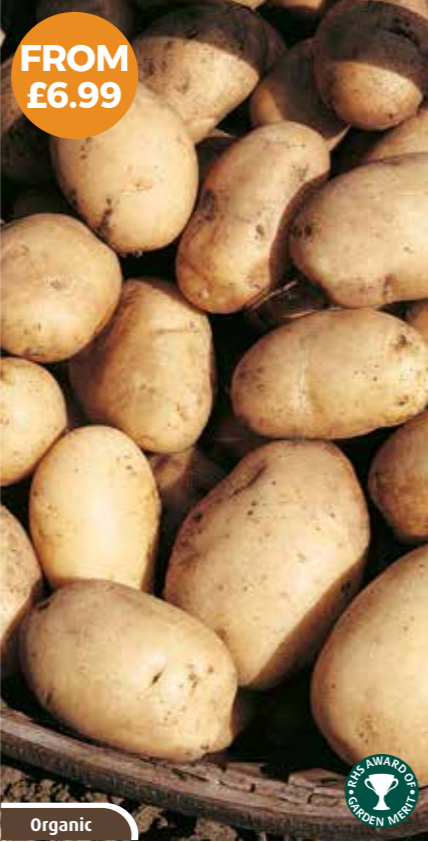

Colleen
Potato 'Colleen' has short oval tubers with white flesh and is an excellent all round potato with high resistance to blight. The tuber has medium dry matter making it suitable for everything from salads to mash.

Grafted plants use rootstock which is more resistant towards soil borne pests and diseases, thus giving naturally 'easy to care for' plants which need less pest control and are ideal to grow organically.

Two tomato plants planted at the same time and treated the same way

The Grafting Process

The top of a tasty fruiting plant variety and a super strong rootstock are skilfully and meticulously removed by hand using a small blade to slice at an angle across each stem. They are then grafted together using a special clip which drops off naturally as the plant grows.

Grafting a tomato plant above the first true leaf 'fools' the plant into thinking it's older than it really is. The plant therefore produces its fruit much earlier and much lower down the stem to give you even greater yield.

Aubergine

Dear Organic Gardener

Welcome to your 2024 Seeds, Plants & Equipment Catalogue

With autumn underway, spring may feel some way away. But we have packed this edition with some of our best selling seed, favourite veg varieties and flavoursome fruit to really get your organic garden ideas growing for the season ahead.

We have new veg seed highlights on pages 4-5 including stringless Climbing French Bean Sunshine, versatile Parsnip Guernsey and disease resistant Pea Rondo.

Best-selling veg seeds can be found on pages 3 and 6-43, including easy to grow Beetroot Rhonda and Carrot Autumn King 2, along with many varieties now at only 89p per pack!

Turn to pages 56-57 to see our organically grown, peat free vegetable plants including the Tomato Grow Bag Collection, and page 68 for potted organic fruit plants like the best selling Blueberry Bluecrop, perfect for growing on the patio or in borders.

As always, it is difficult to fit everything into one catalogue so if you're looking for even more choice be sure to visit www.organiccatalogue.com to view the full range.
