#### Organic

Throughout the catalogue, you'll find a wide selection of organic seeds, easily identified by the ORGANIC flash. This indicates they're produced organically and certified by The Soil Association. Seeds without this flash are grown conventionally and aren't certified organic. We include these to ensure you have the widest variety to choose from, especially as not all varieties are available as certified organic. These conventional seeds are supplied by our sister company, Dobies, who have been supporting keen gardeners since 1894.

#### **PEAT-FREE PROMISE**

**ORGANIC VARIETIES** 

All our plants come with a 100% peat-free promise, meaning they're grown completely without peat. Our vegetable plants are not only 100% peat-free but also pesticide-free and are cultivated using sustainable bio-mass energy. It's part of our commitment to providing environmentally friendly options for your garden.

Growing a 'green manure' is an easy and effective way to add vital organic matter to the soil anywhere in your garden or allotment. The foliage helps to suppress weeds and provides cover for beetles and other pest-eating creatures. The roots will help improve your soil structure. When the green manure plants are dug back into the soil they decay to release their nutrients for whatever you plant next.

Plant green manures into your vegetable crop rotation; grow them anywhere the soil would otherwise be left empty for six weeks or longer. You can still use green manures with a 'No Dig' system. Plants can be hoed off or killed with a mulch. Autumn sown, frost tender varieties are killed off over winter, leaving a protective cover of dead foliage.

best green manures for winter use. Great for storing nutrients, improving soil structure and suppressing weeds. Continues to grow in cold weather. 30cm (12in). Sow: Aug-Oct. Flowers: May-Jun

# The Organic Catalogue Team

Throughout the catalogue, you'll find a wide selection of organic seeds, easily identified by the ORGANIC flash. This indicates they're produced organically and certified by The Soil Association. Seeds without this flash are grown conventionally and aren't certified organic. We include these to ensure you have the widest variety to choose from, especially as not all varieties are available as certified organic. These conventional seeds are supplied by our sister company, Dobies, who have been supporting keen gardeners since 1894.

#### **PEAT-FREE PROMISE**

All our plants come with a 100% peat-free promise, meaning they're grown completely without peat. Our vegetable plants are not only 100% peat-free but also pesticide-free and are cultivated using sustainable bio-mass energy. It's part of our commitment to providing environmentally friendly options for your garden.

Please note; Only one entry per person. Closing date for entries is 23:59 on 30 April 2025. 2 prizes will be drawn at random from all eligible entries and the winner notified by email within 14 days. Prize supplied as £100 voucher to be used at www.organiccatalogue.com with no cash alternative available. Competition also open to existing email members.
